Ecological resort "Ruzha Khutar"

The sanatorium "Ruzhansky" is a mixed enterprise, which functions as a SPA-resort, a classic sanatorium and a resort and rehabilitation medical center with a highly professional staff. During its development, "Ruzha Khutar" has become an ultramodern, high technology resort and rehabilitation center that combines the best practices of the Soviet sanatorium and resort school and the latest medical rehabilitation achievements of the 21st century. Moreover, it has a perfect and modern material and technical basis today.

The sanatorium infrastructure includes 5 comfortable residential buildings and 6 individual houses, 2 medical buildings, a children`s waterpark and 2 pump rooms of the "Ruzhanskaya" mineral water. The sanatorium's "pearl" is a unique, unparalleled SPA-complex, which consists of 6 swimming pools, a complex of baths and saunas, an amber room with a psychological relaxation office and nontraditional types of massage, and also a gym.

There are excellent conditions for spending vacations or weekends in the health center. If you visit the resort "Ruzha Khutar", you will undoubtedly want to return here again.

Quality service with care about Your health!

PIN (TIN): 291187391

Joint venture "FA-uN" LLC

has its own production facility, specializing in the manufacture of modern and highly effective biological preservatives for ensiling feed and probiotic feed additives

Feed probiotic additive "PrimaLac"

It is introduced into ready-made compound feeds, withstands granulation and extrusion farm animals, poultry, aquaculture and pets.

The water-soluble form of "PrimaLac WS" is added to the water for evaporation.

Dry probiotic feed additive for the normalization of digestion processes of farm animals and domestic fowl.

Adding of PrimaLac to the diet allows the desired change in intestinal microflora, reduces the growth of pathogens, increases the function of the immune system, destroys and transforms toxins (including mycotoxins), enhances antibodies formation, and improves digestion.

Thus, "PrimaLac" helps to increase the safety and productivity of livestock, reduces feed costs per unit of production, and allows to completely withdraw from the use of feed antibiotics.

Inoculant "SILA-PRIME"

A unique polyculture of eight strains of complementary bacteria which can preserve almost any agricultural raw material, prevents secondary fermentation, has a good probiotic effect.

The inoculant "SILA-PRIME" allows to receive additionally up to 56 fodder units per 1 ton of silage during fodder ensiling.

Inoculant SILVER-SIL

Is based on a scientifically grounded polyculture of four bacterial strains that mutually complement each other thus ensuring high quality and preservation of silage.

A distinctive feature of the inoculant is the content of heterofermentative lactic acid microorganisms *Lactobacillus buchneri* in it, which are necessary for increased aerobic stability of preserved feed.

Dear friends!

All you have to do to have a new meeting with Belarusian exporters is to turn the next page of this catalogue. For some of you, these are new acquaintances to build mutually beneficial business relations in the future. For others, they are long-standing and time-tested business partners.

As usual, while preparing this meeting, we tried to arrange it as a kind of an exhibition platform, bringing together all the Belarusian exporters, literally from A to Z. And each of the exporters represented on these pages, from the well-known

industrial leaders to the enterprises that are just starting to establish themselves in foreign markets, as before, proudly meets the highest quality standards of the “Made in Belarus” brand.

Welcome to explore the “Belarusian Exporters”!

Best regards,
Mikhael Miatlikov,
Chairman of the Belarusian
Chamber of Commerce and Industry

BELARUS. GENERAL INFORMATION

GEOGRAPHY

The Republic of Belarus is situated in the heart of Europe, at the crossroads of trade routes from west to east and from north to south. It is crossed by the shortest transportation routes linking the CIS countries with the countries of Western Europe. Belarus is bordered by Lithuania and Latvia in the north, Ukraine in the south, Russia in the east, and Poland in the west. Minsk is located 500 km away from Warsaw, 700 km away from Moscow, 1060 km away from Berlin.

Belarus covers the total area of 207,600 sq. km. Its extension from north to south is 560 km and from west to east is 650 km. The country's capital – Minsk – is on the same latitude as Hamburg and Dublin. Belarus' highest point – Mount Dzerzhinskaya (345 m above sea level) – is in the Minsk Region. The country's lowest point is the Neman Valley in the Grodno Region (80–90 m above sea level). The territory is divided into six administrative regions.

CLIMATE

Belarus has a moderate continental climate characterized by mild winters with frequent thaws and rainy warm summers. Average temperatures vary across Belarus. In July, the average temperature is +17°C to +18.5°C. In January, temperatures average from -4.5°C to -8°C. The average annual rainfall is 600–700 mm.

POPULATION

The population of the Republic of Belarus is about 9.2 million people. Belarus is a multinational country with 70 percent of the urban population.

LANGUAGE

Belarusian and Russian are the official state languages in Belarus. The most common languages for business communication with foreign partners are English and German.

PUBLIC, REPUBLICAN AND OTHER HOLIDAYS

The following public and main republican holidays are celebrated in Belarus (the holidays marked bold are officially non-working days in Belarus).

Public holidays:

- Constitution Day – 15 March;
- Day of Unity of the Peoples of Belarus and Russia – 2 April;
- **Victory Day – 9 May;**
- Day of the State Flag, the State Emblem, and the State Anthem of the Republic of Belarus – second Sunday of May;
- **Independence Day (Republic Day) – 3 July.**

Republican holidays:

- **New Year – 1 and 2 January;**
- Fatherland Defenders and Armed Forces day of the Republic of Belarus – 23 February;
- **Women's Day – 8 March;**

- **Labor Day – 1 May;**
- **October Revolution Day – 7 November;**
- Day of People's Unity – 17 September.

Religious holidays:

- **Orthodox Christmas – 7 January;**
- **Easter – by the Orthodox and Catholic calendars;**
- **Radunitsa – by the Orthodox calendar;**
- Memorial Day – 2 November;
- **Catholic Christmas – 25 December.**

If any official non-working holiday falls on a weekend, usually no extra day of rest is provided. If any of the official holidays falls on Tuesday or Thursday, the preceding Monday or the following Friday (respectively) is, as a rule, an official non-working day, while the Saturday nearest to the holiday is a working day.

Foreign organizations in Belarus, such as embassies and consulates, usually celebrate the public holidays of their countries in addition to the Belarussian holidays.

BELARUSIAN CHAMBER OF COMMERCE AND INDUSTRY

The Belarusian Chamber of Commerce and Industry is a non-governmental non-commercial organization operating under the law of the Republic of Belarus 'On a Chamber of Commerce and Industry'. It is the leading business community in the Republic of Belarus uniting more than 2600 member enterprises.

They represent the entire spectrum of the Belarusian entrepreneurship from small businesses and private entrepreneurs to large enterprises that are the flagships of the Belarusian industry.

The Belarusian Chamber of Commerce and Industry is a member of several international organizations: International Chamber of Commerce, World Chambers Federation, Association of European Chambers of Commerce (EUROCHAMBRES), Silk Road Chamber of International Commerce.

The Chamber has been implementing 286 cooperation agreements and memoranda with national and regional chambers of commerce and industry, associations and other organizations in more than 100 countries around the world – traditional and promising trade partners of the Republic of Belarus.

The Belarusian Chamber of Commerce and Industry has promoted the establishment of 24 business cooperation councils, including those with Austria, Bangladesh, Egypt, Georgia, Germany, India, Iran, Italy, Kazakhstan, Korea, Oman, Pakistan, Qatar, Russia, Serbia, Switzerland, Tajikistan, Turkey, Turkmenistan, UAE, Ukraine, Uzbekistan, Vietnam.

The Belarusian Chamber of Commerce and Industry has 43 foreign representatives in 34 countries around the world.

The BelCCI provides entrepreneurs with a wide range of business services.

EXHIBITION UNITARY ENTERPRISE 'BELINTEREXPO' OF THE BELARUSIAN CHAMBER OF COMMERCE AND INDUSTRY

Exhibition Unitary Enterprise 'Belinterexpo' of the Belarusian Chamber of Commerce and Industry is a national exhibition operator that organizes exhibitions and pavilions of Belarusian manufacturers in Belarus and abroad.

EXHIBITIONS ABROAD

Every year, Unitary Enterprise 'Belinterexpo' organizes more than 30 expositions of Belarusian manufacturers at world largest exhibitions.

Own exhibition brands of the enterprise include 'Made in Belarus' pavilions of Belarusian manufacturers, the expositions of food producers 'Belarus. The Taste of Nature', the expositions of enterprises of the woodworking and furniture industry 'Belarus. The Spirit of Comfort' and other.

CONSTRUCTION OF EXHIBITION STANDS

The company develops design and implements the construction of individual and standard exhibition stands of any complexity.

EXHIBITIONS AND CONFERENCES IN THE REPUBLIC OF BELARUS

Belinterexpo Unitary Enterprise has expertise in the field of the arrangement of foreign states' exhibitions in the Republic of Belarus and congress events.

SERVICES

Within its activities, Belinterexpo Unitary Enterprise offers a wide range of services:

- Marketing support, PR and advertising;
- Target partners invitation;
- Congress and business events organization;
- Complex organization of business trips: visa support, transfers, hotel reservation;
- A complex of services for business trips organization: visa support, transfers, hotel reservation.

UNITARY ENTERPRISE OF PATENT SERVICES 'BELPATENTSERVICE' OF THE BELARUSIAN CHAMBER OF COMMERCE AND INDUSTRY

Unitary Enterprise of Patent Services 'Belpatentservice' of the Belarusian Chamber of Commerce and Industry provides business entities with a wide spectrum of services in the sphere of intellectual property (IP) objects management, protection and commercialization in Belarus and abroad.

PATENT PRACTICE

Registration of intellectual property rights: trademarks, service marks, geographical indications, inventions, utility models, industrial designs.

Patent research for the novelty of technical decisions, prior art search as well as infringement search (including of the objects to be exported).

LEGAL PRACTICE

Representation in court, anti-monopoly authority and at the Board of Appeals under the Patent Office, legal support in disputes resolution, claim settlement, prevention of unfair competition, application of customs protection measures,

advisory services on legislation and international agreements in the field of IP, development of contracts of assignment/transfer and pledge of intellectual property objects, franchise agreements, and their registration within the Patent Office.

ECONOMIC PRACTICE

Consulting on the economic aspects of intellectual property management.

DEPOSITING

Depositing of intellectual property objects (software and databases, information on trade secrets (know-how), literature, science, and other types of works).

The materials used for the identification of intellectual property objects are stored at 'Belpatentservice' Unitary Enterprise. The information on the deposited objects is published on the 'Belpatentservice' Unitary Enterprise website and in the BelCCI newsletter 'Mercury'. The Chamber's certificate is issued to the applicant.

INTERNATIONAL ARBITRATION COURT AT THE BELCCI

International Arbitration Court at the BelCCI (IAC at the BelCCI) is a standing non-governmental, non-profit organization, operating on a remuneration basis.

Granting there is an agreement between the parties (an arbitration agreement), the following categories of disputes can be submitted to the IAC at the BelCCI:

- Disputes between any subjects of law, arising in the course of foreign trade and other forms of international economic relations if the location or place of residence of at least one of them is abroad;
- Disputes of legal entities of the Republic of Belarus with other legal entities of the Republic of Belarus and individual entrepreneurs of the Republic of Belarus;
- Other internal economic disputes, arising between the entities of the Republic of Belarus, unless it is

forbidden by the law;

- Disputes between foreign legal entities and individual entrepreneurs located outside the Republic of Belarus.

The obvious advantages of the arbitral procedure include the opportunity to participate in the formation of the court by assigning the size of the bench and appointing certain persons as main and reserved arbitrators, the choice of the applicable law and the language of the arbitration proceeding, the order of proceedings, the possibility of case hearing under the simplified procedure, the confidentiality of case hearing, the finality of the awards delivered by the IAC at the BelCCI, and the possibility to enforce the arbitration awards in any of the 170 countries – members of the UNO Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958).

«KRASNY BORETS»

PERFECTION IN GRINDING- high-tech special grinding equipment

JSC Machine-tool plant «Krasny borets» specializes in manufacturing and selling grinding equipment, including special high-tech machines to solve specific technological problems of the Customer.

Currently, the plant produces a wide range of equipment:

Horizontal - spindle compound - table surface grinding machines
Horizontal - spindle compound - table surface -
profile grinding machines with CNC
Horizontal - spindle compound - console type- table surface
- profile grinding machines with NC and CNC
Surface grinding machines with round table
and horizontal/ vertical spindle
Circular grinding machines, face -circular grinding machines
Internal profile grinding machines with CNC
Thread-grinding machines with CNC
Machines for grinding of rings of
roller spherical bearings with CNC
Spline gear - grinding machines with CNC
Spherical grinding machines with CNC
Machines for creep feed grinding of
hard-to-machine materials with CNC
Machines for grinding of motor camshafts cams with CNC
Machines for simultaneous grinding of
flat parts faces with CNC
Machines for profiling of abrasive grinding wheels with CNC
Machines of diamond - electrochemical grinding with CNC
Knee-type milling machines
Crank presses
Small-scale mechanization machines (sharpening-grinding,
drilling-milling, abrasive belt grinding, cutting-off, manual hydraulic press)
Technological equipment (Vacuum cleaner, swarf conveyor, rectangular
electromagnetic and magnetic chucks, multi-purpose indexing head)
Lock products
HC-17,5-1100 profile covering with polymer coating
Common consumption goods
Industrial furniture and accessories

MANAGEMENT COMPANY OF HOLDING

LIDSELMASH

Reliability proven over the years!

Grain-cleaning and drying equipment as well as storage tanks

JSC "Holding Management Company "Lidselemash" is a leading manufacturer of equipment for grain-cleaning and drying complexes as well as grain storage complexes in the Republic of Belarus.

The complexes are designed for cleaning, drying, temporary storage and discharge of grain and seeds of cereals, maize and rape seeds into railway and motor transport.

For the production of the complex are used the high-strength materials that guarantee their long-term performance; all the complexes are manufactured on high-tech equipment using hot galvanizing, which ensures long-term resistance against corrosion.

Tel.: +375 44 7744283 - sale of complex equipment
Tel.: +375 44 7788669 - sale of spare parts
Tel.: +375 154 548905

Agricultural machinery

JSC "Holding Management Company "Lidselemash" has been operating in the agricultural machinery market since 1981. The sale of agricultural machinery is carried out through a wide dealer network.

The enterprise produces more than 30 types of mounted and trailed agricultural machinery - these are potato-planting and potato-harvesting machinery, tillage machinery, seeders, machinery for harvesting grasses and forage, forestry machinery, municipal machinery.

The production of multimodal containers has been developed. Products are supplied to farms of the Republic of Belarus, as well as for export to CIS countries and far abroad.

Steel panel heating radiators

One of the leading business activities of the JSC "Holding Management Company "Lidselemash" is the production and sale of steel panel heating radiators under the brand name "Lidea".

The production was started in 2009. Radiators "Lidea" are produced on the modern welding line from a leading European manufacturer.

The average production capacity of the workshop allows manufacturing more than 600 thousand radiators per year.

BEARUS

Минский тракторный завод – флагман белорусского машиностроения, продукция которого в особом представлении не нуждается: тракторами BELARUS обрабатывают землю на пяти континентах!

В 2022 году МТЗ выпустил 4-миллионный трактор и обновил фирменный стиль. Бренд получил наименование BELARUS TRACTORS («белорусский трактор») и новое дизайнерское решение, демонстрирующее современный подход к ведению бизнеса.

При этом качественные показатели остались неизменными: трактор BELARUS – народный трактор. Понятный, удобный, честный по соотношению «цена-качество».

Технику BELARUS отличает надежность в эксплуатации, простота в управлении, доступность в техническом обслуживании и умеренная стоимость.

Из более чем 200 модификаций тракторов потребитель может выбрать то, что ему нужно. А если и этого будет недостаточно, то на МТЗ готовы гибко подойти к удовлетворению любого клиентского запроса.

ОАО «Минский тракторный завод»

Minsk Tractor Works is a flagship of the Belarusian machine building, whose products need no special introduction: BELARUS tractors cultivate land on five continents!

In 2022, OJSC "MTW" produced the 4-millionth tractor and updated its corporate identity. The brand got the name BELARUS TRACTORS ("Belarusian tractor") and a new design solution that demonstrates a modern approach to doing business. At the same time, the quality indicators remained unchanged: the BELARUS tractor is a people's tractor. Clear, comfortable, honest in terms of price-quality ratio.

The BELARUS machines are distinguished by reliability in operation, ease of control, accessibility in maintenance and moderate cost. Out of more than 200 tractor modifications, customers can choose what they need. Shouldn't this be enough, OJSC "MTW" is ready to flexibly approach the satisfaction of any client's request.

OJSC "Minsk Tractor Works"
29, Dolgobrodskaya Str., Minsk, 220070,
Republic of Belarus

Fax: +375 (17) 398-89-50

L'Usine de tracteurs de Minsk (UTM) est le chef de file de la construction de machines biélorusses, dont les produits n'ont pas besoin d'être présentés spécialement: les tracteurs BELARUS cultivent la terre sur les cinq continents!

En 2022, la SAO «UTM» a produit le 4-millionième tracteur et a mis à jour l'image de marque. La marque a reçu le nom BELARUS TRACTORS ("tracteur biélorusse") et une nouvelle solution conceptuelle qui démontre une approche moderne de la conduite des affaires.

En cela, les indices qualitatifs sont restés inchangés: le tracteur BELARUS est un tracteur populaire. Compréhensible, confortable, honnête en termes de rapport qualité-prix.

La machinerie BELARUS se distingue par sa fiabilité de fonctionnement, sa facilité d'utilisation, son accessibilité à la maintenance et son coût modéré. Parmi plus de 200 modifications de tracteurs, le consommateur peut choisir le modèle dont il a besoin. Et si cela ne suffit pas, «UTM» est prêt à aborder avec souplesse la satisfaction de toute demande de client.

Hot-Dip Galvanizing Plant Konus – anti-corrosion protection for ages

KONUS
ЗАВОД ГОРЯЧЕГО ЦИНКОВАНИЯ

Hot-Dip Galvanizing Plant Konus provides everlasting anti-corrosion protection of steel structures by hot-dip galvanizing.

We galvanize metal items from small (less than 1 kg) to large (up to 6 tons), as well as sheet metal articles (cable trays, etc.)

We have the biggest hot-dip galvanizing bath in Belarus, 15 m long, 1.8 m width, 3.5 m deep.

Zinc coating thickness starts from 40 microns, in accordance with GOST 9.307-2021 and STB ISO 1461-2009, depending on steel grade and article size. The company complies with Quality Management System STB ISO 9001-2015.

- Hot-dip galvanizing is the most durable and fastest way to protect metal structures from corrosion.
- Service life of galvanized products is not limited.
- Zinc coating does not require repair and renewal during the entire service life of metal structures.
- If a color solution is needed, the galvanized surface can be painted.
- Galvanized products can be used immediately after treatment.
- Zinc coating is resistant to damages (scratches, hole drilling).

MEMPEX LLC – Belarusian manufacturer of construction equipment

Since over 20 years MEMPEX, LLC designs and manufactures equipment for trenchless installation and replacement of underground pipelines.

Our product line includes:

Horizontal auger drilling rigs

High-precision auger drilling rigs are used for installation of underground pipelines according to the required slope. The directional control is accomplished with our own SLK-01 laser navigation system.

Guided horizontal ground piercing machines

Fully guided ground piercing machines are designed for installing trenchless communications under roads and other obstacles. The directional control is accomplished with an underground locating system.

Equipment for trenchless replacement of pipes

Equipment dedicated for trenchless replacement of worn pipelines from manholes $d \geq 1000$ mm or from an excavation.

FILTER ELEMENTS FROM SC "LARTA": RELIABILITY AND EFFICIENCY

246000, Republic of Belarus
Gomel, st. Obezdnaya, 12
+375/232/27-36-16
+375/232/27-36-14
larta@lartagroup.com

The LARTA group of companies specializes in the development and production of filter elements designed to purify natural and associated gas, air, various process fluids and oils. The filter elements produced by the company on the basis of modern technologies and filter materials have low hydraulic resistance, high cleaning efficiency and high dirt holding capacity.

A distinctive feature that contributes to increasing the efficiency of EFP (cartridge filter element), EFP and EFVP filter elements is the in-house production of filter materials and the use of various methods of hydrophobic /oleophobic processing of these materials. Together with specialists from Gazprom PJSC and Gazprom VNIIGAZ LLC, pilot operation of filter elements was carried out at various facilities.

Currently, filter elements of our production are operated at more than 100 oil and gas facilities in Belarus, Russia, Kazakhstan and Uzbekistan, including Belorusneft Production Association, JSC Mozyr Oil Refinery, Gazprom PJSC, Gazprom Neft PJSC, NOVATEK PJSC, Rosneft PJSC and others.

We pay great attention to the production of import-substituting products. Filter elements for the complex purification of natural gas, analogues of products from PALL, PECO, Facet, Parker, Jonell and other foreign manufacturers, are successfully used at the facilities of PJSC Gazprom and Gazprom-Neft. For example, analogues of Pall CS604LGH13, CS604LGT2H13, PS604HFGH13, E604Y100 filter elements are used in separator filters of gas treatment units for transportation at "Baidaratskaya", "Russkaya", "Krasnodarskaya" and "Kazachya" compressor stations. Based on the results of pilot tests and operation, 88 items of our products are included in the Register of Innovative Products and are recommended for implementation at the facilities of Gazprom PJSC.

When developing and putting into production of filter elements, much attention is paid to determining their filtering characteristics on a test bench, which makes it possible to evaluate the effectiveness of their operation under excessive pressure in a wide range of modes and at various mud loads. The stand for testing filter elements has been certified in accordance with the requirements of current standards, the filter element testing procedure has been approved by Gazprom VNIIGAZ LLC.

HEATING EQUIPMENT COMPLIANT TO THE EUROPEAN STANDARDS

LLC "S-TANK WATER HEATERS" is a company which uses modern European technologies. The main activity of the company is production of the heat storage tanks for heating systems usage. Also, the company produces stainless steel tanks and tanks with enameled finish for hot water (DHW) systems.

Today the lineup of proposed products contains tanks from 100 up to 5000 liters. Also, the company can offer the tanks which can collaborate with solar collectors, gas boilers, solid fuel boilers, heat pumps, chillers, recovery systems, water treatment systems and many others.

Indirect heating tanks of P and P2 series with enameled finish of premium quality and SS SOLAR and SS SOLAR DUO series made of high quality stainless steel AISI 304 used in medicine and food industry are the company's special pride.

Our company has all technical capabilities and years of experience in heating equipment production to satisfy various projects and tasks.

ADVANTAGES

- the cost of products is formed in rubles and does not depend on external factors
- reliability – 29 years of experience in production and operation
- the period from placing an order to delivery – 1.5-2 weeks
- own technical, design and engineering departments
- extended warranty – up to 3 years
- full package of project support - online programs for the selection of equipment, equipment models
- fast service - availability of service centers in all major cities of Russia
- SPTA - high-quality and affordable original spare parts, availability of SPTA in service centers
- all products are certified for use in the Russian Federation

Our goal is Your comfort

MANUFACTURER OF CLIMATE CONTROL EQUIPMENT

For more than 15 years, BAIR has been striving for excellence in the field of ventilation equipment. During this time we have become the largest manufacturer of climatic units in the Republic of Belarus and also opened many representative offices in Europe and Asia. The annual output of the company is more than 2500 units. Our equipment works at more than 50,000 facilities of various purposes, which are located on the territory of Belarus, Ukraine, Russia, Kazakhstan, Armenia, Georgia, Uzbekistan, Tajikistan and Turkey.

Today, the company BAIR is a modern industrial complex with a total area of more than 5000 m², of which more than 3000 m² of production and storage facilities. Modern production potential guarantees compliance of all units with the stated requirements and allows to control the products quality. The components of the produced systems are carefully checked for compliance with safety, environmental and quality requirements.

5 Gikalo St., Minsk 220005,
Republic of Belarus
Tel./Fax: +375-17-270-81-42
E-mail: info@atomtex.com

ATOMTEX was established in 1995 and now is a leading research and manufacturing centre of the Republic of Belarus, widely recognised internationally in the area of development and production of equipment for nuclear measurements and radiation monitoring.

Highly qualified professionals with broad experience in nuclear instrumentation are at the core of our team.

More than **200** employees, including staff of engineering research centre, production and service facilities

More than **190** products

Export to **127** countries of the world.
Status of permanent vendor of IAEA, CTBTO, and ROSATOM

Export share **90%**

ATOMTEX is a registered trademark of ATOMTEX SPE in Republic of Belarus, Russian Federation, USA, China, France, Italy, Kazakhstan, Ukraine, Hong Kong, Taiwan, Japan.

25 years our professional team bears responsibility for measurement quality of each device produced by our company as well as its functionality, usability and reliability.

Our high-precision and multifunctional metrological infrastructure, promotion of innovative ideas and advanced technologies, as well as orientation to international standards – all this helps us to create state-of-the-art products of high scientific and technological level.

All our products successfully completed certification in leading metrology institutions in Russia, some of them have been tested by IAEA, Brazil, Germany, China, Korea, and USA in metrology centres.

Development and production of the element base and functional units of microwave equipment (solid-state microwave monolithic integrated circuits - low-noise amplifiers, protective devices, frequency converters, switches, attenuators, phase shifters, resistors). Development and production of optoelectronic components and modules based on them (microwave photodetectors, drivers for laser diodes, semiconductor lasers, receiving and transmitting optical modules); mass production of various types of microassemblies. Development and production of intelligent sensor technology, modules and systems (sensors for inclination, angle of rotation, inductive end position sensors, inclinometers, electronic compasses, strain sensors, vibration acceleration sensors, gas concentration monitoring systems, meteorological complex). Production of heating elements. Provision of services for the application of metallic and resistive

films; application of opaque metal coatings on the surface of optical elements (lenses, glass); the deposition of silver on the metal; automatic SMD mounting of printed circuit assemblies, output mounting of components, wire microwiring, assembly of printed circuit boards; development and production of photomasks with iron oxide and chromium masking coatings. Metalworking on CNC machines. Production of gas connectors. Manufacture of medical products.

Open Joint Stock Company «Rogachev plant «Diaproektor» is a part of the Belarusian Optical and Mechanical Association (BelOMO), which is a recognized leader in optical instrumentation.

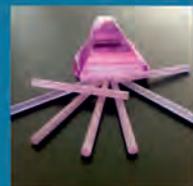

The plant specializes in the production of special-purpose goods, night and day sights for small arms and hunting rifles, night attachments for day sights, night vision devices, surveillance devices for border guards, binoculars, devices for car service stations, automotive components.

OJSC «Plant «Optic» is the largest optical company founded in 1970. Over the years the plant has established a reputation as a reliable manufacturer and supplier high quality optical parts.

THE MAIN KINDS OF PRODUCTS:

- mineral spectacle lenses: single vision stigmatic, single vision astigmatic, with sun-protective coating and anti-computer coating;
- optical parts: lenses, prisms, mirrors, protective windows, plates, microoptics, tubes and rods;
- fiber optics: faceplates, tapers, lighting bundles;
- laser active elements from Nd:KGW and Yb:KYW single crystals;
- optical parts for medical devices: three-mirrors and four-mirrors ophthalmological lenses, lenses for indirect ophthalmoscopy, skiascopy frames, mirror ophthalmoscope.

Asomedica Ltd. is a Belarusian manufacturer of medical consumables and medical equipment.

Founded in 2006, Asomedica has grown into one of the largest manufacturing companies in the Republic of Belarus. The products are in demand not only in the domestic market, but also in the markets of Russia, Kazakhstan, Kyrgyzstan, Ukraine, and Uzbekistan.

The main products are: breathing circuits, catheters, urine bags, filters, etc. Asomedica is the only manufacturer of breathing circuits in the EAEU.

We provide high quality products that meet all international quality standards.

PRODUCTS OF ASOMEDICA Ltd.

Ultrasound scanners

Ultrasonic portable scanner for real-time processing of ultrasound images.

Used in such areas as:

- Obstetrics and gynecology
- Neurology
- Anaesthesiology
- Pediatrics

and for other general examinations

Medical catheters

The catheters are made of phthalate-free polymer material.

Used in such areas like:

- Urology
- Proctology
- Gastroenterology
- Anaesthesiology
- Surgery

Breathing circuits

Breathing circuits are designed for breathing therapy of the patients connected to lung ventilation devices.

Our circuits are compatible with all types of artificial lung ventilation devices and anesthetic-respiratory equipment used in intensive care units.

Urine bags

Large selection of urine bags for collecting urine in inpatient and outpatient departments. Designed to make life easier for patients.

Bacterial-viral filters

Bacterial-viral filters are used to protect the patient and medical staff from potential microbial contamination.

Oxygen masks

Designed for active oxygen therapy.

Mediola 

Mediola - is a medical engineering company that designs and creates surgery laser and devices

Laser surgery equipment and instruments

>1991

We design and introduce integrated surgery laser solutions. The unique application methods of the Mediola products are recognised national clinical practice guide lines.

>100

More than 100 academic papers and articles are dedicated to application particulars of the Mediola products.

>10000

We collaborate with major clinical and research centres.

Mediola lasers are the tools to implement day-surgery in a number of fields

Otorhinolaryngology(ENT)
Endoscopy
Proctology
Urology
Phlebology
Benign neoplasms surgery
Ambulatory gynaecology
Gynecologic laparoscopy
Aesthetic surgery

Mediola Compact

Dual-wavelength surgical laser system bufor private medical centres, ambulatory care centres and short-stay surgery departments.

Mediola Colibri

Laser light delivery tool - optical handpiece connected to a laser device.
Application similar to Mediola Compact.

Кислородные Системы

Joint German-Belarusian Venture Oxygen Systems LLC

Oxygen concentrator
Type: KS MO2-20

- Completely self-contained plant for the production of medical oxygen with attachments and connection of 10 l reserve oxygen cylinders.

- The oxygen concentrator KS MO2-20 can be directly connected to one or more breathing apparatus as an oxygen source.

Oxygen concentrator
Type: KS MO2-10 Tr

- Transport oxygen concentrator for ambulances and reanimation vehicles.

- Due to its compact dimensions, it does not require re-equipment in the car.

- Constant working pressure of 5 bar to drive all breathing apparatus.

Oxygen concentrator
Type: KS MSO2-20

- Fully autonomous plant for the production of medical oxygen with a backup gas station.

- The combination of several modules provides an O2 output of up to 500 l / min.

Oxygen concentrator
Type: KS MO2-10+ Air

- Completely self-contained plant for the production of medical oxygen and compressed air with the ability to mount and connect reserve oxygen cylinders 10 l.

- The oxygen concentrator KS MO2-10+ Air can be directly connected to a breathing apparatus as a source of oxygen and compressed air.

STRUM CJSC

STRUM Closed Joint Stock Company is specializing in the production of ergonomic, functional medical equipment and high-class tools, equipment of hospitals, polyclinics, multifaceted medical centers and dentist's offices.

Due to stable high quality, variety of products and consumer-oriented production, the products of the enterprise are renowned in the territory of the Republic of Belarus, as well as in the Russian Federation and CIS states.

STRUM CJSC has implemented the quality management system meeting the requirements of ISO 9001-2015 and ISO 13485-2016 standards. The EC Declaration of Conformity entitles the enterprise to promote its products on the markets of all EU states and marking the products with CE sign. In its activities, the enterprise focuses on strict conformity of the produced goods to international, legal, technical regulatory acts, consumer requirements; on achievement of optimal price-quality ratio; on the expansion of product range and implementation of advanced production technologies.

The furniture and tools produced by the enterprise comply with the tendencies of modern medicine development and have certificates of the Ministry of Health of the Republic of Belarus, the Federal Service for Surveillance in Healthcare of the Russian Federation, as well as of the Republics of Kazakhstan, Uzbekistan, Kyrgyzstan and of Ukraine. The enterprise manufactures its products of high-quality materials only (including alloy stainless steel) in conformity with world standards and meeting the strict requirements of the field of their application.

STRUM is the right choice!

CJSC "Avgust-Bel"

Avgust-Bel CJSC is the most modern enterprise for the production of crop protection chemicals in the Republic of Belarus, one of the largest in its industry in the CIS.

The factory is a modern technological facility manufacturing various formulations of herbicides, fungicides, insecticides, seed disinfectant, plant growth regulators.

The designed capacity of the company's production complex is 15 million liters of chemicals per year. The product line includes about 90 crop protection items.

All products are primarily focused on meeting the needs for plant protection products in the agrochemical sector of the Republic of Belarus as well as import substitution. Besides, the factory exports products to Russia, Ukraine, Moldova, Kazakhstan, Uzbekistan, as well as to far-abroad countries (Latin America, Africa). The company plans to further expand its export geography.

The production complex of CJSC "Avgust-Bel" features the best achievements of advanced technology. The company uses high-tech equipment from leading European manufacturers. The accredited factory laboratory is equipped with the best devices of their kind that allow for input control of raw materials and manufactured products, thus ensuring the highest quality and ecological safety of the products.

The workshop for the production of polymer containers produces four-layer coaxial canisters for packing the company's products.

CJSC "Avgust-Bel" is certified for compliance with the requirements of ISO 9001: 2015, ISO 14001: 2015 and ISO 45001: 2018.

In 2016, CJSC "Avgust-Bel" was awarded a diploma of the "Best Exporter of the Year" National Contest in the category "Oil refining, chemical and petrochemical industry". By today, 19 products of the enterprise have become laureates of the competition "The Best Products of the Republic of Belarus". Based on the results of 2016 and 2019, CJSC "Avgust-Bel" received the title of the laureate of the Prize of the Belarusian Government for achievements in the field of quality.

CJSC "Avgust-Bel" combines the Belarusian traditions of professionalism and quality

 telephone: +375 (2336) 7-46-44, fax: +375 (2336) 7-29-92,
 +375 (2336) 7-43-24

We are focused on long-term cooperation, we offer competitive prices, while maintaining the high quality of our products!

"HimPromPak" LLC is one of the largest Belarusian manufacturers of polypropylene bags, fabrics for big bags, threads and twine. Our range of products is quite wide - from threads for the base of carpets to threads for the production of polypropylene bags.

We manufacture polypropylene bags of all standard sizes and capacities - from 37x37 cm for 5 kg to 70x120 for 50 kg. A logo or an inscription made in 3 colors can be applied to the bags, a polyethylene liner can be sewn into any of the bags to use it as containers for fine bulk food products.

Fabric for big bags is made with plain weave on a circular loom in the form of a sleeve, half-sleeve from polypropylene film threads with a nominal linear density from 100 to 155 g / m².

Sleeve fabric 150, 180, 188, 200 centimeters.

Blades 300, 360, 366, 400 centimeters (cutting with a thermo knife).

Also, we produce various types of twines (from 90 tex), including hay-knitting twine of 1800-2200 tex, produced on the new equipment of the "BARMAG" company, which makes it possible, with a smaller thickness, to achieve higher specific breaking load than the twine produced on the equipment of the older generation.

Production of furniture for public premises (elevation and traverse office chairs, chairs with metal and wooden carcasses), furniture for public spaces, cabinet furniture.

Dry process fiberboard MDF

Capacity
320
m³/per day

- plate material produced by dry pressing of fine wood chips at high pressure and temperature. Urea resins are used as a binding element, which provides a very low formaldehyde emission, comparable to that of natural wood.
- Formaldehyde emission class-E1.
- MDF is presented as following:
 - sanded;
 - moisture resistant;
 - faced.

Wet process fiberboard

- made on the equipment of «ZGODA» (Poland) by hot pressing of the formed wood-fiber carpet with the addition of special components and additives. Sizing agents are paraffin emulsion and resin.

The accredited laboratory of JSC «Vitebskdrev» carries out the following activities:

- testing of board materials (MDF/HDF, fiberboard, chipboard), laminate floor coverings;
- testing of physical and mechanical characteristics of window and door blocks, profile products made of wood and PVC;
- production of roughness samples;
- the content of formaldehyde in board materials by the perforator method, gas analysis method and chamber method;
- Environmental testing;
- Radiation control of woodworking products;

The tests are carried out according to interstate, European and international standards. Services are provided for certification of workplaces, environmental monitoring, quality control of drinking and waste water according to the scope of accreditation of the laboratory.

The laboratory services are provided by highly qualified personnel on modern testing equipment with the help of modern measuring instruments.

In 2018, the laboratory of JSC "Vitebskdrev" was awarded a diploma for winning the competition "Competence 2017" among the testing laboratories of the Republic of Belarus. The laboratory also has a license for the right to carry out activities related to the control of radioactive contamination. In addition, workshops on test methods included in the scope of accreditation are held.

Production of furniture sets for bedrooms, sets and stand-
alone furniture items for family rooms, living-rooms; hallways,
custom-made furniture.

СЛОНИММЕБЕЛЬ is one of the leading furniture producers in the Republic of Belarus

The range of the products manufactured includes more than fifty items. These are bedroom furniture sets, cabinet furniture sets, furniture for halls, small-size furniture, one-piece furniture, non-serial products made to customer order varying from the simplest bedside table to office furniture. The design peculiarity of the produced furniture consists in the usage of medium-density fiberboard for façade production and decorative surface finishing. Different facing materials are applied for furniture production (simulated wood veneer, natural veneer sheet, film), as well as solid wood.

Slonim furniture is characterized by:

- high quality,
- attractive design,
- comfort,
- modern paint and lacquer materials,
- reasonable price.

agroprodukt-oil.by

The company ranks one of the leading positions in the oil and fat industry of the Republic of Belarus. The main sphere of the company's activities is the processing of oilseeds: the production of vegetable oils and oilseed meal. The company's production capacity provides an opportunity to process 300 thousand tons of oilseeds per year. The number of employees exceeds 200 people.

The company cooperates with over 350 suppliers of raw materials. In 2022 the volume of exported products included 85% of oil and 35% of oilseed meal. We have customers in such countries as China, Russia, Norway, Poland, Lithuania, Latvia, Kazakhstan, Azerbaijan, Israel, Spain, Germany, Nederland.

JSC "Tikhinichi"

offers for sale
a product of its own production

Apple juice, directly squeezed,
pasteurized, 2 or 3 liters

JUICE DIRECTLY SQUEEZED

From apples of modern varieties of Belarusian and foreign selection of the orchard of JSC "Tikhinichi". Pasteurized apple juice, 100% natural product, without colorants, without preservatives and sugar, not clarified, packed in Bag-in-Box bags with or without a cardboard box.

100% NATURAL

SUGARLESS

NO PRESERVATIVES

NO COLORANTS

BAG-IN-BOX bags

Bag-in-Box - it is an innovation for fruit juice packaging. Juice, packed in a flexible oxygen-proof bag and protected from light by a cardboard box, retains its properties and aroma for several months. The Vitop aseptic stopcock, tamper-evident, allows only the right amount of product to be used, while protecting against oxygen ingress.

GRODNO MEAT PROCESSING PLANT, JSC

IS ONE OF THE BELARUSIAN MEAT MARKET LEADERS

Grodno Meat Processing Plant is an enterprise with long-lasting history. Today, one of the largest representatives of the Grodno region food industry is known not only all around Belarus, but also far beyond its borders. Apart from the Russian Federation, Grodno meat and sausage products are purchased by more than a dozen countries worldwide. First of all, it concerns the republics of the post-Soviet space, such as Azerbaijan, Uzbekistan, Kazakhstan, Georgia, Armenia and others. Also, the Grodno products are familiar to consumers in Vietnam and China.

There are about 500 items in the Grodno Meat Processing Plant product range. More than 3 thousand tons of sausages and several hundred tons of semi-finished products are rolled off the conveyor every month. Beef and pork are also produced.

The guaranteed quality of products allows the meat processing plant to expand its sales markets, thereby ensuring economic efficiency.

LLC "Gear Export" has been collecting, processing and selling wild (blueberries, cranberries, lingonberries) and garden (raspberries, currants) berries for more than 10 years. The main priority of production is the high quality of the supplied products. We are constantly searching, improving production and, at the same time, taking our relations with customers to a new level. Mutually beneficial cooperation, constructive dialogues, our company is always looking for optimal solutions – this is what we always value and what we always use for business development. The company also provides services for the storage of frozen and chilled products.

mogilev free economic zone

Benefits

Favorable location

The Republic of Belarus borders on Latvia, Lithuania, Russia, Poland and Ukraine. It is advantageously located at the intersection of major trans-European highways

Mogilev region is the eastern region of the Republic of Belarus. In the east the region borders on Smolensk and Bryansk regions of the Russian Federation

Human Resources

Qualified specialists in metalworking, chemical, construction, engineering, economic, legal and other spheres are trained by 7 higher institutions, 22 institutions of secondary specialized education and 36 institutions of vocational education in Mogilev region

Industrial potential

Mogilev region has a powerful industrial potential and is represented by the following industries:

- chemical and petrochemical;
- mechanical engineering and metalworking;
- woodworking and pulp-and-paper

Assistance and individual approach

Assistance to the investor at all stages of land selection and registration for the organization of production in "Mogilev" FEZ

Individual approach to a potential resident of "Mogilev" FEZ

Preferences

Tax benefits

Exemption from Profit Tax
Exemption from Real Estate Tax
Exemption from payment of rent for the land plots located within the boundaries of FEZ

Customs preferences

Are granted by the Free Customs Zone (FCZ) procedure

The goods that have been placed under the FCZ procedure are exempt from customs duties and taxes

FEZ residents are exempt from VAT (on raw materials previously imported under the customs procedure of FCZ) when exporting finished products to the Eurasian Economic Union

Infrastructure financing

If investment scope of a project exceeds EUR 10 mln, construction of the required engineering and transport infrastructure is financed on the funds provided in the State Investment Program and local budgets

Save up to 30%

Reducing tax burden by 30% compared to other business entities, saving time and money for the implementation of production up to 30%

Infrastructure

All 18 plots of "Mogilev" FEZ are located in industrial hubs of the Mogilev region, have developed engineering and transport infrastructure

Resort and rehabilitation center "Ruzhansky"

The resort and rehabilitation center "Ruzhansky" is an all-year resort of the highest service category. It is located in the most beautiful corner of Belarus, in a pine forest on the bank of picturesque Lake Papernya in Ruzhanskaya Pushcha that is an integral part of Belovezhskaya Pushcha. Moreover, it is placed far from large cities, factories and enterprises.

The sanatorium infrastructure includes 5 comfortable residential buildings and 6 individual houses, 2 medical buildings, a SPA-complex, a lot of baths and saunas, a children's waterpark, 2 winter gardens, 2 zoological gardens and also 2 pump rooms of the "Ruzhanskaya" mineral water. There are gazebos and braziers for a company dinner in nature, children playgrounds on the territory of the health center. A boat station with a summer café, a wood-fired sauna, a rental agency, a pier for rest and fishing, places for sunbathing and air bath, boats and paddleboats for organizing sailing in summer time, an aquabesedka can be found on a well-equipped sandy beach.

Business activities:

- rehabilitation of:
 - respiratory diseases;
 - diseases of the musculoskeletal system and connective tissue;
 - diseases of the circulatory system;
 - gynecological diseases;
 - gastrointestinal diseases;
 - oncology;
- endocrinology;
- gastroenterology;
- dentistry;
- cosmetology;
- physiotherapy;
- ultrasound diagnostics;
- round-the-clock inpatient facility;
- phytotherapy;
- acupuncture (dry needling);
- otorhinolaryngology;
- allergiology;
- neurology;
- pediatrics.
